## MEDICAL PLASTERS

---

Medicine adhesive plasters are being cut into various forms and sizes or rolled also in various sizes. The underlying material can be: non-woven textile, silk, cotton or viscose fabric, plastic foils. The coating can be made with Zinc-oxide glue or the other hypoallergic glue.

The plaster can have an antiseptic padding. Medicine adhesive plasters are widely used for healing and protection of the smaller wounds and burns, corn-horns, rheumatic diseases and for the fixing of bandage materials, compresses, injection needles, cannulas, catheters etc.

Shel Life of Antirheumatic and Corn-horns plasters is 2 (two) years, Burn dressings – 3 (three) years and the other types of plaster – 5 (five) years after Date of Production; providing the appropriate storing conditions. Quality Control is being made according to EUR.Ph., national and internal standards.
